

Proactively Reduce Risk

Sonian's cloud archive is the easiest way to pre-serve, access and act on communications data.

Sonian securely preserves electronic communications, making them searchable and accessible in the cloud.

ARCHIVE

Preserve every inbound and outbound email and file attachment in the secure and dynamically scalable cloud archive.

SEARCH

Find and access exactly what you need in seconds with fast and accurate search tools.

ACT

Filter, tag and export relevant content to meet legal, compliance and corporate governance demands.

Adaptable and dependable

Sonian's archive is an adaptable solution that supports a wide variety of email platforms, including Microsoft Exchange (cloud and on premises), IBM email platforms (cloud and on premises), Rackspace Hosted Email, Google Apps / Gmail and many others.

The Sonian platform leverages many AWS world class services, including S3 Storage, providing 99.99% uptime and more than 99.99999% data durability and availability.

About Sonian

Sonian preserves, protects and presents the world's information.

More than 38,000 customers in 43 countries trust Sonian's secure proprietary platform to retain, retrieve and surface critical data and protect intellectual property.

Founded in 2007, Sonian is the only pure public cloud information archiving company, providing services that are easy, flexible, actionable and reliable for OEM partners and their end customers. Sonian allows companies to preserve, access and analyze their electronic communications for legal, regulatory and continuity purposes while gaining organizational insights.

Sonian is building the future and solving big data problems for companies, all while managing more than 20 billion objects in the cloud.

- No additional infrastructure
- No lengthy service engagements
- No system downtime
- Hands-free installation

PEACE OF MIND

- Secure cloud storage
- Authenticated user access
- Audit trail
- Role-based permissions

FREEDOM

- No search limitations
- No search timeouts
- Unlimited concurrent searches

What customers are saying about Sonian

"The ability to archive data indefinitely at an affordable cost separated Sonian from the competition."

VP of IT Security - Financial Institution

"My favorite aspect (of Sonian) is the fact that I now feel like we do not have any 'blind spots' related to our email process. We're ready for whatever comes."

CFO - Large General Contractor

"Sonian's archive is outstandingly easy. With my previous vendor, I had people coming to me daily saying their password wasn't working or an attachment couldn't be downloaded. Searches that once took hours to complete now only take seconds. I could not be more pleased with the service."

IT Manager - Marketing & Management Consulting Firm
